## REPORT PRODUCTION OF NEW SHIP, SHIP'S INSTRUMENTS

The first commercial vessel of the German Democratic Republic has been completed in the Staatswerft Stralsund Shipyard and is to be put into service on 13 October 1950. The 1,350-ton ship, to be christened Vorwaerts, will serve as a freighter but will be used simultaneously as a training ship for crews of the East German merchant fleet.

The people-owned Control Apparatus Plant in Pirna-Coppitz will start production of control switches for East Germany's fleet of luggers in 1951. Production will include electric switches for ship's engines and lighting systems.
